- There are B660 lower spec models for 10k (msi b660), if you buy that can add ,more money in gpu purchase .
- In this build gpu is bit an average one. If we have like 15k left for gpu you could had got RTX 2060 super.
- Power supply little bit future proof calculated -thats y its 4k
- Storage propably you should buy 1TB WD blue internal hdd within one year because now way days one single game is like 60gb .
